

NGUYEN MANH CUONG

Software Engineer with 3 years of experience building enterprise applications. Experienced in authentication systems, third-party integrations, optimization, and large-scale platforms serving millions of customers

-  **Objective:** **Software Engineer** focused on building high-performance and scalable systems, with a strong interest in **Data Engineering, DevOps, and AI technologies**.
-  **Technical:** Java, Spring Boot, PostgreSQL, Keycloak, CI/CD, Microservices, Docker, ReactJs,...
-  **Github:** github.com/cuong02n
-  **Email:** hi@cuong02.com
-  **Phone:** +84 335652578
-  **Portfolio:** portfolio.cuong02.com
-  **Linkedin:** <https://www.linkedin.com/in/cuong02n/>

»»» Education

- 9/20 - 6/24 **Computer Science** **Hanoi University of Science and Technology**
- » GPA: 3.65/4.00 with **Excellent Degree** in Computer Science.
 - » Studied Artificial Intelligence, Deep Learning, Algorithms, Data Structures, Database Systems, Information System Architecture, Software Engineering and System security.

»»» Work Experience

- 7/25 - 8/26 **Software Engineer** **Nexusti JSC**
- » Developed and maintained fintech collection and CRM platforms serving over **1 million customers** for banks and financial institutions
 - » Designed and implemented UI-UX frontend, **microservices**, database schemas, indexing strategies, scheduled jobs, and third-party integrations using **ReactJs, Java, Spring Boot, and PostgreSQL**
 - » Owned the notification module, integrating **SMS, Zalo, email, and real-time calling services** to support customer communication workflows
 - » Implemented authentication and authorization solutions using **JWT, OAuth2, Keycloak, SSO, RBAC**
 - » Optimized database access for log and reporting systems containing millions of records and improved system performance
 - » Maintained **GitLab CI/CD pipelines** and integrated **Docker/Kubernetes** for containerized deployments

11/23 - 6/25	Software Developer	DAC Data Technology Vietnam JSC
» Developed new features, conducted testing, and fixed bugs for a calculation application that performs complex operations on precision-sensitive data. » Developed data crawler tools in different domains: Governance, Real Estate, Advertisement, » Designed and applied a custom library for exporting huge datasets (millions of rows) to Excel, achieving a 95% reduction in CPU and memory consumption.		
11/23 - 6/25	Data Engineer	DAC Data Technology Vietnam JSC
» Contributed to monitoring ETL processes for large-scale data processing to support advertising campaigns using a low-code data pipeline platform. » Followed professional development processes, conducted code reviews, and collaborated cross-team on technical solutions.		
3/23 - 10/23	Fullstack Game Developer	Vietdefi LLC
» Developed a multithreaded system for real-time PvP games using Java and the Vert.x framework. » Utilized efficient data structures, event-loop architecture, WebSocket/REST APIs to optimize the game system. » Used React.js to build an administrative web application for the game system.		

»»» Certification / Achievement

Algorithm Code Competition

Codeforces

- » Achieved a Codeforces rating of approximately 1600 in competitive programming contests.

Java Certificate 1Z0-808

Oracle Corporation

- » Earned the Oracle Certified Associate (OCA) Java SE 8 certification.

TOEIC

IIG organization

- » TOEIC Listening & Reading: 700+
