

# NGUYEN MANH CUONG

Backend Engineer with 3+ years of experience building enterprise applications. Experienced in authentication systems, third-party integrations, optimization, and large-scale platforms serving **millions of customers**.

 **Objective:** Backend Engineer focused on high-performance and automation systems

 **Technical:** **Java, Spring Boot, JPA/Hibernate, WebSocket, MySQL, PostgreSQL, JWT, OAuth2, Keycloak, GitLab CI/CD, Linux.**

 **Github:** [github.com/cuong02n](https://github.com/cuong02n)

 **Email:** [hi@cuong02.com](mailto:hi@cuong02.com)

 **Phone:** +84 335652578

 **Portfolio:** [portfolio.cuong02.com](https://portfolio.cuong02.com)

## »»» Education

9/20 - 6/24      **Computer Science**      **Hanoi University of Science and Technology**

- » GPA: 3.65/4.00 (**Excellent Degree**, Top 3% of graduates)
- » Studied Artificial Intelligence, Deep Learning, Algorithms, Data Structures, Database Systems, Information System Architecture, and Software Engineering

## »»» Work Experience

3/23 - 8/23      **Game Backend Developer**      **Vietdefi LLC**

- » Developed a multithreaded system for real-time PvP games using Java and the high-performance Vert.x framework
- » Utilized efficient data structures, event-loop architecture, WebSocket, and REST APIs

11/23 - 3/25      **Software Developer**      **DAC Data Technology Vietnam JSC**

- » Led development of a food ordering web platform using Spring Boot.
- » Developed data crawling solutions for food delivery platforms.
- » Designed and implemented a custom library for exporting large datasets (millions of rows) to Excel, achieving a **95% reduction in CPU and memory consumption**.

1/25 - 6/25      **Data Engineer**      **DAC Data Technology Vietnam JSC**

- » Contributed to advertising ETL pipelines for large-scale campaign data processing

7/25 - 6/26

## Software Engineer

Nexusti JSC

- » Developed and maintained fintech collection and CRM platforms serving over **1 million customers** for banks and financial institutions
- » Designed and implemented **microservices**, database schemas, indexing strategies, scheduled jobs, and third-party integrations using **Java, Spring Boot, and PostgreSQL**
- » Owned the notification module, integrating **SMS, Zalo, email, and real-time calling services** to support customer communication workflows
- » Implemented authentication and authorization solutions using **JWT, OAuth2, Keycloak, SSO, RBAC**
- » Optimized database access for log and reporting systems containing millions of records and **improving system performance**
- » Maintained **GitLab CI/CD pipelines** and integrated notifications for automated build monitoring

### »»» Project

For more, please visit [portfolio.cuong02.com](https://portfolio.cuong02.com)

10/20 - 3/22

## Android - Sudoku Game

- » A Sudoku game solver written in Java, deployed on Google Play Store
- » URL: [Google Play Store](#)
- » Focused on algorithm optimization and performance, with a basic Android UI

2024

## Crawl phone number

- » Built a high-performance multi-threaded crawler using a database-backed BFS queue architecture.
- » Implemented automated anti-bot mechanisms including session renewal, cookie re-fresh, proxy rotation, rate-limit and CAPTCHA and anti-bot challenge handling.
- » Developed a real-time WebSocket dashboard for monitoring crawler activities.

### »»» Certification / Achievement

8/23

## Algorithm Code Arena

Codeforces

- » Achieved a Codeforces rating of approximately 1600 in competitive programming contests.

4/25

## Java Certificate 1Z0-808

Oracle Corporation

- » Earned the Oracle Certified Associate (OCA) Java SE 8 certification.

5/26

## TOEIC

IIG organization

- » TOEIC Listening & Reading: 700
